Dear Swift Team,
Swift ,
India.

Dear Recruitment Team,

I am writing to express my interest in the Frontend Developer Internship at Swift. As a Computer Science student passionate about crafting seamless and scalable web applications, I am drawn to Swift's mission of transforming e-commerce through connected and efficient digital solutions.

I have hands-on experience with **React, JavaScript, TypeScript, and Tailwind CSS**, focusing on building clean, responsive, and user-friendly interfaces. Currently, I am developing a **Chat App (on-going)** — a real-time communication platform built using **Next.js, Mongodb, and Tailwind CSS**. The project emphasizes smooth user interactions, efficient message handling, and a clean UI, reflecting my commitment to both functionality and design.

I have done **Front-end projects** like **real-estate** and **simple stop watch**. These experiences have strengthened my understanding of **component-based architecture, async data fetching, and Git-based collaboration**, while instilling a strong focus on maintainability and performance optimization.

I am eager to contribute to Swift's innovative e-commerce solutions and learn from an environment that values technical excellence, collaboration, and creativity. I believe my skills and passion for frontend development align perfectly with the role and your team's vision.

Thank you for considering my application. I would welcome the opportunity to discuss how I can contribute to Swift's engineering efforts.

Best regards,
Varun Bharadwaj S
